MongoDB PHP

Development & Operations

Jest GIT

PROJECTS

Threads app clone

https://threads-app-ebon.vercel.app/

Messaging App Development built with React Native with Typescript

- Developed a messaging app clone using React Native, which includes features such as user authentication, group creation, real-time messaging, and media sharing.
- Utilized TypeScript and Expo 49 to create a pixel-perfect and intuitive user interface, resulting in a clean and user-friendly experience for the app's users.

Furniture King App

http://furniturekingapp.vercel.app/

- Integrated Augmented Reality (AR) functionality, allowing users to visualize furniture products in their own space before making a purchase
- Developed an intuitive and user-friendly admin page, empowering the internal team to efficiently manage brand additions, product updates, and other administrative tasks, streamlining operations and reducing manual effort.
- Currently working on an interactive dashboard to provide real-time analytics and insights to stakeholders, enabling data-driven decision-making and enhancing business performance.
